Deadline for manuscript submissions: closed (31 December 2023)

Message from the Guest Editor

Dear Colleagues,

The distinct microenvironment in the brain, including the existence of a disrupted blood-brain barrier (BBB), dense cellularity, etc., poses a demanding requirement for clinical diagnosis and treatment of brain metastasis (BM). BM is common in cancer patients, especially in lung cancer, breast cancer and melanoma, and is associated with high mortality. Lack of mandatory screening and reporting may lead to underestimated incidence. Regarding treatment, local treatments such as surgery and radiotherapy (WBRT, SBRT) are only eligible for selected patients, due to the and treatment-related widespread nature of BM complications. The delivery of systemic treatment is hurdled by the BBB, and repurposing of temozolomide in BM has not been validated in large randomized controlled trials. Emerging immune checkpoint inhibitor represents a novel option, yielding long-term response in some cases, and biomarkers to identify eligible patients are under exploration. Hopefully, technically solid and clinically relevant studies on BM may help improve patients' care.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research. biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous*))
