Message from the Guest Editor

Dear Colleagues,

Advances in the field of diagnostics of liver diseases have been spurred as the mechanisms of liver diseases are revealed one after another, helping to revolutionize diagnostic accuracy and providing increased precision in targeted therapeutics.

This Special Issue welcomes contributions covering the current aspects of mechanisms and therapeutic approaches for liver disease. Submissions may include articles of current original research, new experimental methodology, and/or review articles summarizing the current state of the art for clinical diagnosis, state-of-the-art treatment, new mechanism of liver disease, and management of liver disease. I look forward to receiving your contributions.

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
