### **Message from the Guest Editor**

With this Special Issue in *Biomedicines*, we aim to present a journal on the actual state of the art in order to understand the pathophysiology of Primary aldosteronism (PA), different subtypes of genetic abnormalities or concurrent hypercortisolism, the effects of excess aldosterone on other organ/systems, and the treatments of PA (from bench to clinic). We welcomed the submission of review and original research articles (clinical or basic) regarding pathophysiology, clinical implications, as well as the diagnosis and treatment of PA.
