submissions:

closed (31 January 2024)

Message from the Guest Editor

Dear Colleagues,

The lipid class of molecules constitutes a large set of bioactive compounds that play a role in general physiology as well as in multiple diseases, such as obesity, diabetes, and cardiovascular disease. Furthermore, disturbances in lipid metabolism have been associated with certain types of cancer. In this Special Issue, you are invited to highlight new insights into the physiological and pathologies roles of these interesting biomolecules. Special attention may be given to the potential of these molecules not only as therapeutic targets for pharmacological development, but also as biomarkers in disease (outcome) prediction. Research papers as well as reviews dealing with the role of lipids in health and disease are welcomed.

Dr. Menno Hoekstra

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
