### Message from the Collection Editors

Obesity and diabetes have become epidemic worldwide, and the incidences of these chronic metabolic diseases are more prominent in older people. Many age-associated diseases are associated with inflammation. Thus, the term “inflamm-aging” has been coined.

While tremendous progress has been made in obesity, diabetes, inflammation, and aging over the years, many unanswered questions remain regarding the in-depth molecular mechanisms of these pathological conditions. Immunometabolism has recently merged as a new frontier of biological research. The COVID-19 pandemic has further brought immunity to the forefront of science. It is not only important to study the initiation of infection/inflammation, but also to understand the resolution of inflammation that is critical for disease resilience and prognosis.

This Topic Collection aims to serve as a catalyst for bringing together like-minded experts to share novel findings and perspectives in “Molecular Mechanisms of Obesity, Diabetes, Inflammation and Aging”. This collection welcomes original research articles as well as up-to-date reviews.

We look forward to reading your contributions.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Peter E. Nielsen

Department of Cellular and  
Molecular Medicine, Faculty of  
Health and Medical Sciences,  
University of Copenhagen,  
Blegdamsvej 3C, DK-2200  
Copenhagen, Denmark

### Prof. Dr. Lukasz Kurgan

Department of Computer  
Science, Virginia Commonwealth  
University, Richmond, VA 23284,  
USA

## Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
