Message from the Guest Editors

Dear Colleagues,

We are pleased to invite you to contribute to a Special Issue dedicated to the peripheral nervous system that aims to highlight its plasticity during development and adulthood. The peripheral nervous system originates from neural precursors of the neural crest that differentiate into a variety of different cell types that are able to guide the fibers to the periphery to establish precise contact with a target. This sophisticated system is able to conduct sensory inputs and convey motor outputs while still maintaining its regenerating capability throughout life to sustain possible mechanical injury and activate repair mechanisms.

Deadline for manuscript submissions:

closed (25 August 2022)

an Open Access Journal by MDPI

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
