Deadline for manuscript
submissions:

closed (30 September 2022)

Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to focus on the complex interactions between inflammation and hemostasis with special attention on the unique biological functions and molecular and cellular interactions between these pathways. Submission of original research articles and reviews is encouraged. Research areas may include (but are not limited to) the following:

- Basic research studies exploring novel molecular or cellular interactions in the fields of inflammation and hemostasis (including animal models);
- Clinical studies related to acute or chronic inflammatory states in patients and their effect on the hemostasis system (including studies on COVID-19);
- Studies addressing novel therapeutic targets in inflammatory and/or hemostasis pathways;
- Studies on novel methods, models, or biomarkers of related fields.

We look forward to receiving your contributions.

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Biochemistry*)
