## **Biosensors and Diagnostic Platforms in Support of Global Health, Antimicrobial Stewardship, Food Sustainability, and Water-Environmental Quality**

Guest Editor:

**Prof. Dr. Evangelyn C. Alocilja**

Nano-Biosensors Lab,  
Department of Biosystems and  
Agricultural Engineering,  
Michigan State University, Farrall  
Agricultural Engineering Hall, 524  
S. Shaw Lane, Room 115, East  
Lansing, MI 48824-1323, USA

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### **Message from the Guest Editor**

This Special Issue of *Biosensors* invites papers on novel approaches in biosensors and biosensing platforms that address unmet needs in the quick detection and diagnosis of diseases and biomarkers, particularly those with global societal impacts on human health, animal health, animal production, plant protection, water quality, environmental sustainability, food safety, biosecurity, and antimicrobial stewardship. The COVID-19 pandemic has also highlighted the need for the rapid detection of biomarkers and indicators in asymptomatic cases. A major focus of this edition is addressing the accessibility of these biosensing technologies in terms of affordability, simplicity, and resource-limited operability and how they could be incorporated in the arsenal of prevention strategies against future pandemics. Papers and abstracts presented at the “Innovation Forum: Bridging Technologies and Market Needs” are welcome to this Special Edition.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Giovanna Marrazza**

Department of Chemistry “Ugo Schiff”, University of Florence, Via della Lastruccia 3, 50019 Sesto Fiorentino, Italy

## Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (*Chemistry, Analytical*) / CiteScore - Q1 (*Engineering (miscellaneous)*)
