Deadline for manuscript
submissions:

closed (31 December 2012)

Message from the Guest Editor

Dear Colleagues,

This special issue will be devoted to general label-free affinity sensors. Different types of receptors could be included: Antibodies; Receptors; DNA and RNA Aptamers; Biomimetic receptors: molecularly imprinted polymers. All type of label-free transduction could be addressed (electrochemical, optical, acoustic...). Amplification of signal using nanoparticles, CNTs, quantum dots... should be highly appreciated. Multiarray of micro/nanotransducers will be preferred. All types of application domains are acceptable.

Prof. Dr. Nicole Jaffrezic-Renault

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Chemistry, Analytical*) / CiteScore - Q1 (*Engineering (miscellaneous)*)
