Deadline for manuscript
submissions:

closed (20 September 2022)

Message from the Guest Editor

Dear Colleagues,

Wearable biosensors are surging, evidenced by the escalating interest from both academia and the healthcare industry. Due to their capability for the noninvasive, real-time, and continuous monitoring of various health information of the human body, wearable biosensors have shown unique advantages in remote patient tracking, early diagnosis, and personalized medicine. In this Special Issue, we would like to invite you to contribute research articles, reviews, or perspectives related to “Wearable Biosensors for Human Health Monitoring”. The welcomed topics include but are not limited to smart biosensing materials, novel wearable biosensing technologies, power management and energy harvesting, data transmission, algorithm development, wearable device integration, and performance validation.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Chemistry, Analytical*) / CiteScore - Q1 (*Engineering (miscellaneous)*)
