

an Open Access Journal by MDPI

Feature Papers in Medical Biotechnology

Guest Editors:

Dr. Jose Caparros-Martin

Faculty of Health Sciences &
Curtin Health Innovation
Research Institute (CHIRI), Curtin
University, Bentley, WA 6102,
Australia

Dr. Tomoaki Kahyo

Department of Cellular &
Molecular Anatomy, Hamamatsu
University School of Medicine, 1-
20-1 Handayama, Higashi-ku,
Hamamatsu, Shizuoka 431-3192,
Japan

Deadline for manuscript
submissions:

closed (30 November 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to publish high-quality articles covering topics related to the latest research and developments in the field of medical biotechnology. Potential topics include, but are not limited to, the following:

- Genetic engineering;
- CRISPR technology;
- Recombinant DNA technology;
- Gene sequencing;
- Antibody production;
- Pharmaceutical products;
- Drug design;
- Drug delivery system;
- Cell culture;
- Disease diagnosis and treatment;
- Molecular diagnostics;
- Protein therapeutics;
- Gene therapy;
- Vaccines production;
- Tumor models;
- Cell and tissue engineering;
- In vivo imaging;
- Biomolecule imaging;
- Medical and ethical issues.
