Deadline for manuscript
submissions:

closed (5 December 2021)

Message from the Guest Editor

A biomarker of brain injury is any measurable indicator of central nervous system injury. Biomarkers in medicine are currently used for diagnosis, evaluation of disease severity, and prognosis. This Special Issue aims to collect papers about a broad range of pathological conditions, from acute brain injuries (e.g., traumatic brain injuries, hypoxic–ischemic brain injury, subarachnoid hemorrhage, ischemic stroke) to demyelinating diseases (e.g., multiple sclerosis) and neurodegenerative disease (e.g., Alzheimer’s disease, frontotemporal dementia, Parkinson’s disease). We are especially interested in blood and cerebrospinal fluid biomarkers, but neurophysiological and neuroimaging studies will also be considered if they provide clear evidence of a marker of brain injury. Both studies on animal models and humans will be evaluated. Research and review papers will be welcomed.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
