Message from the Guest Editors

Dear Colleagues,

A more holistic understanding of human behaviour can be achieved by investigating the interplay between physiology and psychology, rather than a singular focus on either. Therefore, the aim of this Special Issue is to highlight interdisciplinary research that focusses on how the interaction between our sense of smell and individual differences may influence, motivate, and predict human behaviour. In this series, we invite researchers investigating, for example, how our sense of smell may influence mate choice and the maintenance of romantic relationships, how odour aversions may motivate avoidance behaviour and which personality traits may predict olfactory ability. Submissions to this Special Issue are limited to papers that include some form of individual differences measure (e.g., questionnaires, behavioural, neuroimaging). Manuscripts that are exclusively focussed on olfaction research in general will not be considered.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
