Message from the Guest Editors

Recent demographic patterns show an increasing global shift towards an aging population. There is a pressing need to understand how aging affects cognition, especially memory since the ability to learn new information and retrieve learned information is essential for successful aging. Modifications in memory abilities significantly affect the quality of life in older adults, research is currently directed toward furthering the understanding of the brain and behavior linked to these changes. The natural aging process does not negatively affect all types of memory, aging can be characterized as a period of memory gains and losses since some abilities stay the same, some get better, others decline, highlighting important paradoxes regarding age-related memory performance.

The main goal of this Special Issue is to present novel approaches for the purpose of furthering our understanding of the mechanisms and processes underlying age-related memory changes by drawing upon diverse methodologies, including cross-cultural comparisons, experimental designs, longitudinal designs, and neuroimaging assessment, on different aspects of age-related memory performance.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience,
University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
