Message from the Guest Editor

Dear Colleagues,

The current pandemic caused by the SARS-CoV-2 virus has emphasized the importance of understanding the relationship between humans and ecosystems. Environmental pollutants (e.g., metals, POPs, and pharmaceutical compounds residues) influence animal and human behavior, as well as several cognitive abilities such as learning capacity. These compounds use different pathways to cause these and other neurodevelopmental disorders. However, knowledge on the neurotoxic potential of environmental pollutants in ecosystems is scarce. This Special Issue will include in vitro (cell-based), field/wildlife, and experimental studies, as well as epidemiological and biomonitorization studies, linking the relationship between exposure to environmental pollutants and neurotoxicity, including the development of neurodegenerative diseases and other neurological disorders. Therefore, the collective aim of this Special Issue will be to offer a comprehensive collection of focused articles providing useful and up-to-date resource for scientists working in this field.

Keywords

- environmental contaminants
- neurotoxicity
- biomarkers of exposure and effects
- metals
- neurotoxics

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience,
University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
