

## Editorial Board Members' Collection Series: Building Structures III

Guest Editors:

**Prof. Dr. Michele Barbato**

Civil and Environmental  
Engineering, University of  
California, Davis, CA 95616, USA

**Dr. Giovanni Minafo**

Department of Engineering,  
Universtiy of Palermo, Viale delle  
Scienze, 90133 Palermo, Italy

**Dr. Elena Ferretti**

Department of Civil, Chemical,  
Environmental, and Materials  
Engineering (DICAM), Università  
di Bologna, 40126 Bologna, BO,  
Italy

### Message from the Guest Editors

Dear Colleagues,

We are pleased to announce a new Collection titled "*Editorial Board Members' Collection Series: "Building Structures" III*", which will collect papers invited by the Editorial Board Members.

The aim of this Collection is to provide a venue for networking and communication between *Buildings* and scholars in the field of *Building Structures*. All papers will be published as open access following peer review.

Please view the following link for more information:

Deadline for manuscript  
submissions:

**closed (31 March 2024)**

## Editor-in-Chief

### Prof. Dr. David Arditi

Construction Engineering and Management Program,  
Department of Civil,  
Architectural, and Environmental  
Engineering, Illinois Institute of  
Technology, 3201 South  
Dearborn Street, Chicago, IL  
60616, USA

## Message from the Editor-in-Chief

Current urban environments are home to multi-modal transit systems, extensive energy grids, a building stock, and integrated services. Sprawling neighborhoods are composed of buildings that accommodate living and working quarters. However, it is expected that the cities and communities of the future will face complex and enormous challenges, including maintenance, interconnectivity, resilience, energy efficiency, and sustainability issues, to name but a few. A smart city uses advanced technologies and a digital infrastructure to improve the outcomes in every aspect of a city's operations. A smart building optimizes the experience of occupants, staff, and management by using a modern and connected environment. Innovations in technology that can bring dramatic improvements to design, planning, and policy are critical in developing the cities and buildings of the future.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (*Architecture*)
