Message from the Guest Editors

Dear Colleagues,

We are pleased to announce a new Collection titled
“*Editorial Board Members' Collection Series: “Building
Structures” I*”, which will collect papers invited by the
Editorial Board Members.

The aim of this Collection is to provide a venue for
networking and communication between *Buildings* and
scholars in the field of *Building Structures*. All papers will
be published as open access following peer review.

Prof. Dr. John Mander

Prof. Dr. Andrea Benedetti

Dr. Erwin Oh

Message from the Editor-in-Chief

Current urban environments are home to multi-modal transit systems, extensive energy grids, a building stock, and integrated services. Sprawling neighborhoods are composed of buildings that accommodate living and working quarters. However, it is expected that the cities and communities of the future will face complex and enormous challenges, including maintenance, interconnectivity, resilience, energy efficiency, and sustainability issues, to name but a few. A smart city uses advanced technologies and a digital infrastructure to improve the outcomes in every aspect of a city's operations. A smart building optimizes the experience of occupants, staff, and management by using a modern and connected environment. Innovations in technology that can bring dramatic improvements to design, planning, and policy are critical in developing the cities and buildings of the future.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (*Architecture*)
