

## **Sustainable Architecture Regards to Global Challenges: Implementation and Evaluation**

Guest Editors:

**Dr. Łukasz Mazur**

Konstancińska 1, 02 942 Warsaw,  
Poland

**Prof. Dr. Anna Bać**

Faculty of Architecture, Wrocław  
University of Science and  
Technology, Bolesława Prusa  
53/55, 50 317 Wrocław, Poland

Deadline for manuscript  
submissions:

**31 December 2024**

### **Message from the Guest Editors**

This Special Issue invites all kinds of integrated research that are aimed at real problem-solving through sustainable architecture. We invite designers, researchers and educators to exchange their knowledge and experience in order to improve the natural and built environment for future generations. Potential topics include, but are not limited to:

- Low energy and low carbon buildings;
- The embodied energy of materials;
- The whole life cycle of buildings;
- Zero waste constructions;
- Environmental impact assessment;
- Resilient cities and urban growth;
- Energy-efficient and sustainable technologies;
- Education towards and beyond sustainability.

## Editor-in-Chief

### Prof. Dr. David Arditi

Construction Engineering and Management Program,  
Department of Civil,  
Architectural, and Environmental  
Engineering, Illinois Institute of  
Technology, 3201 South  
Dearborn Street, Chicago, IL  
60616, USA

## Message from the Editor-in-Chief

Current urban environments are home to multi-modal transit systems, extensive energy grids, a building stock, and integrated services. Sprawling neighborhoods are composed of buildings that accommodate living and working quarters. However, it is expected that the cities and communities of the future will face complex and enormous challenges, including maintenance, interconnectivity, resilience, energy efficiency, and sustainability issues, to name but a few. A smart city uses advanced technologies and a digital infrastructure to improve the outcomes in every aspect of a city's operations. A smart building optimizes the experience of occupants, staff, and management by using a modern and connected environment. Innovations in technology that can bring dramatic improvements to design, planning, and policy are critical in developing the cities and buildings of the future.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Architecture)
