## The Surgical Management of Colorectal Cancer

Guest Editor:

**Prof. Dr. Gyung-mo Son**

Department of Surgery, Pusan  
National University Yangsan  
Hospital, Pusan National  
University School of Medicine,  
Yangsan, Republic of Korea

Deadline for manuscript  
submissions:

**31 May 2024**

### Message from the Guest Editor

This Special Issue focuses on the surgical management of colorectal cancer, highlighting critical aspects of surgical development. It aims to present the latest research on colorectal cancer surgery and its practical applications, offering insights that can enhance patient care pathways. In recent years, there have been significant advancements in surgical treatment for colorectal cancer. The continuous development of surgical equipment and surgical techniques has contributed to the refinement of colorectal cancer surgery. The potential capacity of these advancements in surgical and imaging technologies to bridge the gap in surgical outcomes is attributed to differences in surgeons' experience. Furthermore, the recent expansion of real-time surgical information analysis through artificial intelligence is ushering in a new era, in which a wealth of information can be seamlessly provided to surgeons during procedures. These breakthroughs in surgical techniques exhibit potential regarding their ability to reduce complications in colorectal cancer surgeries, thus enhancing procedural safety and potentially improving long-term disease-free survival rates for cancer patients.

Houston, TX 77030, USA

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
