Deadline for manuscript
submissions:

closed (31 December 2023)

Message from the Guest Editors

Dear Colleagues,

The integration of multi-*omics* approaches with extensive genetic and pharmacologic screens has provided a comprehensive view of the vulnerabilities (or “dependencies”) featuring human cancers. The concurrent advancement in chemical biology and drug development has been projecting the scientific community towards an unprecedented scenario whereby any disease-associated factor may become druggable.

This special issue will focus on present understanding of the actionability of hematological cancer dependencies, including both cancer cell-intrinsic and tumor microenvironment-mediated mechanisms. We invite authors to contribute original research articles, communications as well as review articles.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
