Message from the Guest Editor

Dear Colleagues,

We are pleased to invite you to contribute to this Special Issue of *Cancers* on “PET/CT Imaging in Head and Neck Cancer”. PET/CTs provide valuable multimodal information regarding the tumor extent, heterogeneity, and biological activity of head and neck tumors. Importantly, recent advancements in radiomics and machine learning have opened new doors to the application of quantitative and automated analysis of PET/CTs in oncologic imaging. The aim is to have a collection of at least 10 articles, and this Special Issue can be printed in book form if this number is reached.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Pharyngeal/laryngeals cancers;
- Thyroid carcinomas;
- Salivary gland tumors;
- Head and neck melanomas;
- Cervical lymphomas;
- Upper esophageal cancers;
- Parathyroid cancers.

I look forward to receiving your contributions.

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
