submissions:

**closed (31 August 2021)**

### Message from the Guest Editor

Dear Colleagues,

The sellar and parasellar region is a complex anatomical region that contains many important structures in a relatively small space. As a major consequence, a broad spectrum of lesions can occur in this site, including neoplastic, inflammatory, infectious and vascular conditions. The diagnosis of these lesions can be challenging. Recent years have witnessed several advances in the understanding of the imaging, endocrinological, biological and molecular features and of surgical approaches of sellar and parasellar lesions, allowing for an accurate diagnosis and novel therapeutic approaches. But many challenges remain in terms of diagnosis, prognosis and optimal, personalised treatment.

This Special Issue will focus on new advances and the challenges in the pathology, diagnosis, therapeutic approaches, as well as novel biological and molecular features, of the lesions of the sellar and parasellar region. Original research articles and reviews are encouraged to elucidate and identify the current status and future directions in this topic.

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
