Deadline for manuscript  
submissions:

**closed (20 December 2023)**

### Message from the Guest Editors

Dear Colleagues,

Dysregulation of Wnt signaling is known to be associated with various cancers. As such, identification of novel Wnt pathway targets in cancer and better characterization of already-known targets present exciting, emerging opportunities for cancer treatment and perhaps even prevention. In this Special Issue, we propose to cover Wnt pathway targets in cancer, with a focus on solid tumors, especially highly lethal cancers of the liver (e.g., HCC), pancreas (e.g., PDAC), and GI tract. Topics may include but are not limited to the role(s) of Wnt pathway targets in cancer stem cells, nonparenchymal cells, cancer metabolism, tumor immune response, and tumor microenvironment. Original research articles, review articles, as well as short communications are invited for this Special Issue.

We look forward to receiving your contributions.

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
