## Targeting Human Glioblastoma Stem-Like Cells (GSCs)

Guest Editors:

**Dr. Benedikt Linder**

Experimental Neurosurgery,  
Neuroscience Center, Goethe-  
University Frankfurt, Theodor-  
Stern-Kai 7, D-60590 Frankfurt  
am Main, Germany

**Dr. Ander Matheu**

Cellular Oncology Group,  
Biodonostia Health Research  
Institute, E-20014 San Sebastian,  
Spain

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Glioblastoma remains a virtually incurable disease with a dismal prognosis for patients and a plethora of open questions. The current standard therapy consists of surgery, radiochemotherapy and, in some cases, the application of tumor-treating fields. Even though promising new therapeutic avenues are underway, novel and especially directed approaches are direly needed. In particular, much research in recent years showed that GBM cells can obtain a highly plastic and dynamic phenotype, which gives these cells a stem-like state that enables them to out-live conventional therapies and ultimately replenish the tumor. In order to collectively present and aggregate recent developments in precision oncology, we invite both original research and review articles highlighting key aspects of glioblastoma biology, with a special focus on stem-like cells.

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
