

catalysts

Dear Colleagues,

We are pleased to announce the two winners of the *Catalysts* 2020 Travel Awards (**1000 Swiss Francs each**). The winners are **Dr. Kai S. Exner**, a postdoctoral fellow at Sofia University, Bulgaria, and **Dr. Olga Sacco**, a postdoctoral fellow at University of Salerno, Italy.

2020 TRAVEL AWARD WINNER

Dr. Exner's research focuses on electrocatalysis and computational catalysis. He plans to attend the 11th International Frumkin Symposium in Moscow, Russia, to present his work entitled "Beyond the Conventional Volcano Picture: Toward High-Throughput Screening by a Unifying Approach".

Dr. Sacco's research activity is focused on photocatalysts and photocatalytic processes for the degradation of organic pollutants from water and wastewater. She plans to attend the 11th European Conference on Solar Chemistry and Photocatalysis: Environmental Applications (SPEA11), Turin, Italy, to present her work entitled "Enhanced photocatalytic removal of water pollutants by coupling luminescence materials with N-doped TiO₂".

Congratulations to **Dr. Exner** and **Dr. Sacco**. We are grateful to all who submitted applications.

Kind regards,
Catalysts Editorial Office
