10th Anniversary of *Catalysts*: Biocatalysis in Analysis and Synthesis—Past, Present and Future

Guest Editors:

Dr. Evangelos Topakas

Biotechnology Laboratory,
School of Chemical Engineering,
National Technical University of
Athens, 9 Iroon Polytech Str,
Zografou Campus, 15780 Athens,
Greece

Prof. Dr. Roland Wohlgemuth

MITR, Institute of Applied
Radiation Chemistry, Faculty of
Chemistry, Lodz University of
Technology, Zeromskiego Street
116, 90-924 Lodz, Poland

Dr. David D. Boehr

Department of Chemistry, The
Pennsylvania State University,
University Park, PA 16802, USA

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editors

Dear Colleagues,

The “Biocatalysis” section has taken the initiative to launch a Special Issue entitled “Biocatalysis in Analysis and Synthesis—Past, Present and Future”. The “Biocatalysis” section in *Catalysts* continues to grow, with 46 Special Issues and 409 articles published to date. While we intend to keep the scope of this Special Issue broad in order to adequately reflect the diversity of research within “Biocatalysis”, some areas of interest include: (i) discovery methodologies for desired enzyme functions; (ii) relationships among enzyme structure, function and mechanism; (iii) development and analysis of robust and sensitive enzyme assays; (iv) novel enzymes; (v) scalable 1-step, multi-step and total biocatalytic synthesis. The aims and scope of this Special Issue are, however, not limited to these five areas of interest and potential authors are encouraged to be forward-thinking in their articles, by proposing important questions and obstacles in their areas of interests and means of addressing them. We are also interested in highlighting newly emerging areas for “Biocatalysis”.
