Message from the Guest Editor

The significant upsurge in energy demand and global warming are among the most critical challenges faced by modern society today. Catalysts play a pivotal role in addressing these issues, as they have the ability to convert polluting compounds into clean fuels. In this Special Issue, “Application of Metal-Based Nanocatalysts for Environment and Energy”, we would like to highlight the research devoted to the development of metal-based nanocatalysts to address these issues.

You are welcome to visit the **website**, submit the **abstract**, and **full paper**. Any questions please feel free to contact the managing editor Angela Xue (angela.xue@mdpi.com). We look forward to receiving the contribution from you!
