Emerging Research in Renal Cell Carcinoma

Guest Editor:

Dr. Giandomenico Roviello

Department of Health Science, University of Florence, 50139 Florence, Italy

Deadline for manuscript submissions:

closed (31 January 2024)

Message from the Guest Editor

Dear Colleagues,

Renal cell carcinoma (RCC) is an area of active investigation, with ongoing efforts to improve the diagnosis, treatment, and management of this disease. Previous studies have focused on identifying new biomarkers for early detection, developing targeted therapies that improve outcomes and reduce side effects, and exploring the role of immune checkpoint inhibitors in RCC treatment. Recent areas of interest include the use of combination therapies, the development of predictive models to guide treatment decisions, and the use of liquid biopsies to monitor disease progression. Overall, these studies hold promise for improving outcomes for patients with RCC and advancing our understanding of this complex disease, which is the aim of this Special Issue.

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. Cells encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
