Advances in Anti-EGFR Therapy of Metastatic Colorectal Cancer

Guest Editor:

Dr. Guglielmo Nasti

Department of Abdominal
Oncology, Istituto Nazionale
Tumori di Napoli, IRCCS “G
Pascale”, Naples, Italy

Deadline for manuscript
submissions:

closed (15 September 2021)

Message from the Guest Editor

The aim of this Special Issue is to describe the innovative and less explored topics concerning the anti-EGFR treatment of mCRC, focusing on the following:

1. EGFR inhibition in mCRC—beyond the antibodies-based therapy;
2. Genetic profiling of the EGFR pathway—new approaches to ameliorate patient selection;
3. Links between anti-EGFR treatments and immune system activation.

One review on “where do we stand and where do we go” is also welcome.

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
