Deadline for manuscript submissions:

closed (30 November 2022)

Message from the Guest Editors

Dear Colleagues,

Autoimmune diseases are caused by the breakage of self-tolerance and the appearance of pathogenic antibodies against normal tissue proteins. These autoantibodies may have a direct, damaging effect on their target tissues, or the autoantibodies may stimulate and activate receptor molecules and induce aberrant downstream effects. Autoimmune diseases target various tissues, such as the epidermis, thyroid, neuromuscular junction, myelinated nerves or the pancreas.

The purpose of this Special Issue is to provide an overview of the molecular mechanisms of human autoimmune diseases and their therapies. We especially welcome manuscripts addressing novel molecular mechanisms of treatments for autoimmune diseases, as well as the characterization of autoantibody effects on their target cells and cellular responses induced by autoantibodies, including signaling. We encourage submission of review articles and original research papers of any length. Our aim is to provide a comprehensive update on autoimmune diseases, their pathomechanisms and therapy options.

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
