Biology of Boron Neutron Capture Therapy (BNCT) 2021

Guest Editors:

Prof. Dr. Wolfgang Sauerwein

Prof. Dr. Mitsuko Masutani

Prof. Dr. John Hopewell

Deadline for manuscript
submissions:

closed (30 September 2021)

Message from the Guest Editors

Dear Colleagues,

The appearance of hospital-based epithermal neutron sources has made boron neutron capture therapy (BNCT) a dedicated focus of innovative developments in radiation oncology. At this very moment, it seems appropriate and important to collect results of recent preclinical and early clinical research and publish them together with intelligible and clear reviews of the most challenging aspects of BNCT.

https://www.mdpi.com/journal/cells/special_issues/BNCT_2021

This special issue is intended for contributions on all cytobiological aspects related to BNCT. However, we would like to place a special emphasis on review articles that highlight the development of preclinical BNCT research with cells and tissues. You are invited to submit your papers before the deadline 30 September 2021. Relevant observations made at the cellular level could come from the following areas:

- Radiation biology for BNCT;
- Cell-based studies;
- Preclinical animal studies;
- Drug development for BNCT;
- Impact of BNCT on the proteomic profile and omics approaches;
- Boron imaging;
- Mechanisms of action of BNCT;
- Abscopal effect of BNCT;
- Early clinical trials;
- Biomarkers for therapeutic optimization.

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
