Medical Oncology, School of
Medicine, University of Missouri,
Columbia, MO, USA

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editor

Dear Colleagues,

Hematopoietic cell transplantation is a well-established treatment approach for hematological malignancies and provides a significant curative approach. Graft versus host disease is a life-threatening complication that causes long-term morbidity and mortality following allogeneic hematopoietic cell transplantation. Recent advances in prophylaxis and active therapy have created significant impacts on the treatment of graft versus host disease. Still, several pieces are missing in the pathophysiology of graft versus host disease. The aim of this Special Issue is to highlight recent findings in the research area of graft versus host disease and graft versus host leukemia. We welcome the submission of original research articles and reviews of both basic and translational studies.

Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
