Marquis, F-35042 Rennes, France

Deadline for manuscript  
submissions:

**closed (31 May 2021)**

### Message from the Guest Editor

Dear Colleagues,

Regulation of gene expression is a fundamental process, not only in normal conditions, to maintain cellular and tissue homeostasis, but also in disease states, including carcinogenesis. Cancer cells are exposed to multiple intrinsic and extrinsic stimuli during tumor onset and progression, including crosstalk with the tumor microenvironment, leading to the activation of various signaling pathways. This Special Issue aims at providing a review of the literature as well as emerging experimental evidence of the multifaceted regulation of gene expression in cancer. Specific topics in this Special Issue include the regulation of chromatin architecture, the role of chromatin remodeling complexes, the analysis of oncogene and tumor suppressor gene promoters, mutations of transcriptional regulators, post-transcriptional modifications leading to modified activity of transcriptional regulators, post-transcriptional RNA processing, regulation of RNA and protein abundance by non-coding RNAs, and RNA stability. We look forward to your contributions to this Special Issue.

Dr. Cédric Coulouarn

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
