Technology, Lodz, Poland

Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editors

Dear Colleagues,

There is a huge global demand for renewable and biodegradable food packaging for sustainability. Functionalized nanocomposites have been investigated for their biosensing features and real-time monitoring of food spoilage by microbes and other factors. Natural antimicrobial agents have been commonly preferred in active packaging owing to their abundance, biocompatibility, and biodegradability.

The main aim of this Special Issue is to disclose the significance of the latest development in sustainable food packaging. We are pleased to invite submissions in the form of original research articles, short communications, letters, prospects, and mini reviews.

This Special Issue is not limited to active and intelligent packaging but also welcomes manuscripts on electrospun nanofibers, kinetics on the release of active components, edible films/coatings processing, encapsulation techniques, life cycle analysis, novel techniques of biopolymer extraction, waste valorization, quorum sensing, bionanocomposites, naturally derived polysaccharides/proteins, structural modification of biopolymers, circular bioeconomy, modeling, etc.

Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
