

## PVD/CVD Deposition Processes, Coatings Characterization and Coatings Failure Analysis

Guest Editor:

**Dr. Francisco J. G. Silva**

Department of Mechanical  
Engineering, ISEP–School of  
Engineering, Polytechnic of  
Porto, 4200-072 Porto, Portugal

Deadline for manuscript  
submissions:

**closed (30 November 2021)**

### Message from the Guest Editor

PVD and CVD are sustainable and environmentally friendly processes which are able to improve the lifespan of surfaces or give them a more suitable look regarding application. Despite more than five decades of exploring PVD and CVD deposition techniques, these techniques evolve constantly, trying to fulfill the market requirements. Regarding the huge number of researchers involved in research and development directly related to PVD and CVD techniques, as well as to the improvement of coatings characteristics, this Special Issue will try to collect important contributions related, though not limited, to the topics announced. High-quality, novel researches are very welcome, as well as reviews on the aforementioned topics. Recent new coatings formulations and systems, laboratory works, traditional and novel applications, coatings failure analysis, reports in extended coatings lifespan, wear mechanisms affecting coated surfaces, and failure mechanisms affecting coatings in the most diverse applications are very welcome in this Special Issue.

## Editors-in-Chief

**Prof. Dr. Wei Pan**

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

**Dr. Emerson Coy**

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
