

## Advances in Polymer-Based Thin Films

Guest Editors:

**Dr. Nitin Krishnamurthy  
Hansoge**

Corporate Research Laboratory,  
3M, St. Paul, MN, USA

**Dr. Ana Drinčić**

Department of Material  
Chemistry, Institute of Chemistry,  
Hajdrihova 19, 1000 Ljubljana,  
Slovenia

**Dr. Ivan Jerman**

Assistant Professor, Department  
of Material Chemistry, National  
Institute of Chemistry, Hajdrihova  
19, 1000 Ljubljana, Slovenia

Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editors

Polymer-based coatings and thin films provide excellent mechanical, thermal, and chemical properties, which make them ideal for many advanced applications.

This Special Issue aims to present recent advances in the field of polymer-based coatings and thin films, with a focus on synthesis, processing, characterization, and performance evaluation and covering topics from fundamental understanding to practical applications. Original research papers, reviews, and perspectives are welcome, including but not limited to the following:

- Novel synthesis and processing methods for polymer-based coatings and thin films.
- Surface modification of polymers for improved adhesion, wetting, and corrosion resistance.
- Multifunctional coatings and thin films for sensing, actuation, and energy storage.
- Bioinspired coatings and thin films for biomedical applications.
- Advanced characterization techniques for polymer-based coatings and thin films.
- Computational modeling and simulation of polymer-based coatings and thin films.
- Scale-up and manufacturing of polymer-based coatings and thin films.
- Challenges and opportunities in commercializing polymer-based coatings and thin films.

## Editors-in-Chief

**Prof. Dr. Wei Pan**

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

**Dr. Emerson Coy**

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
