of Technology, Harbin, China

Dr. Shengkun Xie

Global Management Studies, Ted
Rogers School of Management,
Toronto Metropolitan University,
Toronto, ON M5G 2C3, Canada

Deadline for manuscript
submissions:

closed (31 December 2023)

Message from the Guest Editors

Machine learning (ML) algorithms are powerful tools used in making decisions and predictions in real-world complex systems, including medical diagnoses, the spread of infectious diseases, financial modelling and insurance pricing. However, in most cases, these algorithms do not provided explanations for how they reach the results and have a barrier preventing the achievement of a broader adaptation of machine learning or, more generally, artificial intelligence (AI) technologies in decision-making problems.

This Special Issue aims to collect outstanding research papers on building statistical or computational models that can provide sufficient interpretability for decision-making problems. The application domains may include computational intelligence, engineering, business and economics.

Both theoretical development and applied work addressing the interpretability of models for decision making in a broader sense are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to submit the results of your research for consideration and publication in *Computation*, an international open access journal, which is published quarterly online by MDPI.

The editorial board and staff of *Computation* are dedicated to establishing a benchmark journal for the world scientific and engineering communities for original research articles, reviews, conference proceedings (i.e., peer reviewed full articles), and communications, in the cutting-edge areas of computational biology, computational chemistry, and computation in engineering.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, Inspec, dblp, and other databases.

Journal Rank: CiteScore - Q2 (*Applied Mathematics*)
