Message from the Guest Editors

Dear Colleagues,

Following the initial outbreak of research triggered by the discovery of topological insulators just a decade ago, the concept of topology continues to drive the expansion of the frontiers in modern condensed matter physics.

Target topological materials of current interests include various forms of superconductivity, novel semimetals, and correlated magnets. Efforts to firmly establish Majorana particles in condensed matter also extends to these variety of topological materials. The aim of this special issue is to bring together active scientists in this field to discuss recent advances in topological materials science, thereby to identify the most important questions and find directions to answer them.

Prof. Antonio Bianconi

Message from the Editor-in-Chief

Welcome to *Condensed Matter* (ISSN 2410-3896)! It gives me great pleasure to invite you to publish in the journal. We are looking to build a collection of high quality research articles, supported by a community from across the field of condensed matter physics. In this task, I will be assisted by a highly qualified editorial board. We accept papers on basic research as well as applications, and experimental or theoretical work. Currently the journal is indexed by ESCI (Web of Science) and hope you can consider *Condensed Matter* as an exceptional home for your manuscript.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: [CiteScore - Q2](#) (*Condensed Matter Physics*)
