A 10 Years Journey: Chemical, Physical, and Biological Properties and Applications of Crystals

Guest Editors:

Prof. Dr. Helmut Cölfen

Prof. Dr. Abel Moreno

Prof. Dr. Charles Rosenblatt

Prof. Dr. Stawomir Grabowski

Prof. Dr. Shujun Zhang

Deadline for manuscript
submissions:

closed (31 January 2021)

Message from the Guest Editors

Dear Colleagues,

This is the topic the journal *Crystals* has focused on for the last 10 years. To mark this anniversary, a Special Issue edited by the editor in chief and all section editors is inviting all editorial board members as well as prominent scientists in the field for contributions. The coverage of topics of this Special Issue is as broad as that of the journal, ranging from nucleation, growth, processing, and characterization of crystalline and liquid crystalline materials to the mechanical, chemical, electronic, magnetic, and optical properties of crystals as well as the diverse applications of (nano)crystalline materials. In addition, all modern methods for the characterization of crystal nucleation and growth are of interest, including high resolution characterization techniques such as synchrotron radiation or X-ray free electron laser-based techniques.

We especially invite contributions from the four major sections of *crystals*, namely, liquid crystals, crystalline materials, crystal engineering, and biomolecular crystals.

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
