Message from the Guest Editors

This Special Issue on "Dielectrics: Propelling Technological Progress" aims to showcase the latest research and advancements in the field of dielectric materials. We invite original research papers and reviews highlighting innovative approaches and applications in understanding, designing, and utilizing dielectric materials across various fields. The issue is especially interesting in papers exploring dielectric phenomena at the nanoscale, dielectric materials for energy storage, dielectric theory and modeling advances, and dielectrics in electronics and communication devices. By gathering diverse research in one place, we aim to stimulate interdisciplinary conversation and propel the field of dielectrics forward.

Welcome to *Crystal*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystal*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the crystal, where science merges with beauty and innovation.
