## Anisotropic/ Isotropic Microstructural Design in Additive Manufacturing

Guest Editors:

**Dr. Ozkan Gokcekaya**

Anisotropic Design & Additive  
Manufacturing Research Center,  
Osaka University, Osaka, Japan

**Prof. Dr. Takayoshi Nakano**

Distinguished Professor in  
Division of Materials and  
Manufacturing Science, Graduate  
School of Engineering, Osaka  
University, Suita, Osaka 565-  
0871, Japan

**Dr. Evren Yasa**

Department of Mechanical  
Engineering, Eskisehir Osmangazi  
University, 26040 Eskisehir,  
Turkey

Deadline for manuscript  
submissions:

**closed (11 January 2024)**

### Message from the Guest Editors

The additive manufacturing (AM) techniques, feasible for use with customized, small-scale production, are emerging and being highlighted as a replacement for traditional manufacturing technologies.

Despite the many advantages of AM methods, including design flexibility, producing functionally graded parts, and a significantly lower buy-to-fly ratio, aspects such as the development of high residual stresses and, possibly, the formation of detrimental phases and defects in additively manufactured parts are a matter of concern. Thus, further research is required to overcome many challenges AM faces today.

This Special Issue aims at providing new ideas and presenting the latest advances on AM of metallic materials, with a particular emphasis on anisotropic/ isotropic microstructural design to optimize structural/ functional properties and promote the applications of AM.

of Pisa, 56126 Pisa, PI, Italy

## Message from the Editor-in-Chief

Welcome to *Crystal*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystal*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the crystal, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
