

## Solution Processing and Properties of Oxide Films and Nanostructures

Guest Editors:

**Prof. Dr. Chien-Jung Huang**

Department of Applied Physics,  
National University of Kaohsiung,  
Kaohsiung 81148, Taiwan

**Prof. Dr. Chin-Hau Chia**

Department of Applied Physics,  
National University of Kaohsiung,  
Kaohsiung 81148, Taiwan

**Prof. Dr. Kuan-Wei Lee**

Department of Electronic  
Engineering, I-Shou University,  
Kaohsiung 84001, Taiwan

Deadline for manuscript  
submissions:

**31 December 2024**

### Message from the Guest Editors

This Special Issue will address the solution processing of nanostructured oxides and related hybrid materials with specific functionalities depending on processing conditions. We invite authors to contribute original research as well as review articles on the current state of research on the synthesis and processing of solution-derived oxide and nanocomposite thin films, patterned surfaces, and nanostructures, including their properties and applications.

Topics to be covered are solution synthesis, structure evolution and phase growth, fabrication, and porous or oxide nanostructures, including their assembly into functional components. The characterization by advanced analytical methods, establishment of processing–structure–property relationships, and application of solution-derived oxides in forefront technologies are addressed. Finally, integration issues in the realization of devices will also be considered.

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
