Message from the Guest Editors

Dear Colleagues,

The scope of this Special Issue of *Crystals*, entitled “Advances in Functional Inorganic Materials Prepared by Wet Chemical Methods”, includes, but is not limited to, the preparation routes, characterization, and application of functional inorganic materials, as well as hybrid materials that are important in the fields of electronics, optics, and biomedicine, among others. We would like to invite you to submit your work in the form of an original research article or a review paper related to the investigation of bulk materials, nanomaterials, or thin films.

Deadline for manuscript

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.
