Message from the Guest Editors

I am gratified to welcome you to submit your valuable work for a Special Issue of the journal *Crystals* on “Recent Advances in Photonic Crystal and Optical Devices”.

Photonic crystals (PhCs) have been the subject of numerous investigations since the original work of Yablonovitch and John. Due to their exceptional attributes, the potential applications of PhCs are highly prospective, ranging from gas sensing to optical filters, photonic papers, optical logic gates, lasers, inkless printing, and reflective flat displays. In recent years, the development of optical devices based on PhCs is taking place at a rapid pace. These devices can be utilized in various attention-grabbing applications, such as monitoring/sensing of temperature, proximity, pressure, light, ultrasonic, chemicals, etc.

This Special Issue will cover new developments and recent advances in the design, fabrication, and performance evaluation of PhC-based optical devices. Original research work, letters, and review papers based on theoretical, numerical, and experimental data are welcome in this Special Issue.

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
