Message from the Guest Editors

Dear Colleagues,

Humans like to synthesize and explore crystalline substances, and sometimes, some crystals may surprise us. In these unique cases, it is necessary to focus our attention on many factors and determine the true one, which is the initiator of structural rearrangements. These unique phenomena include jumping crystals, changes in the crystalline phase under pressure, UV radiation, [2+2] cycloaddition reaction, etc. Not all observed phenomena can be unambiguously characterized using single crystal X-ray analysis; in some cases, a wide range of physicochemical methods should be used to determine the cause. Therefore, we would be grateful if you could share your experimental observations that will help other researchers as well.

of Pisa, 56126 Pisa, PI, Italy

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
