# Non-equilibrium Thermodynamics and Crystals

Guest Editors:

#### Dr. George D. Verros

Department of Chemistry, Aristotle University of Thessaloniki, P.O. Box 454 Plagiari Thes, 57500 Epanomi, Greece

#### Dr. Raj Kumar Arya

Department of Chemical Engineering, Dr. B.R. Ambedkar National Institute of Technology, Jalandhar 144011, India

Deadline for manuscript submissions: closed (31 March 2024)

#### Message from the Guest Editors

Crystals played an important role in the development of non-equilibrium thermodynamics from the early 20<sup>th</sup> century. Nowadays, there is an increasing interest not only in novel materials, such as nano-crystals, but also in nonequilibrium thermodynamics methods. The aim of this Special Issue is to bring together researchers from both areas to share methods and ideas. The topics include but are not limited to:

- 1. Nano-crystals;
- 2. Modeling of bio-macromolecules interactions;
- 3. Crystallization theories;
- 4. Kinetics of crystallization;
- 5. Thermodynamics of crystallization;
- 6. Crystallization in industrial processes far from equilibrium;

**Special**sue

- 7. Phase separation and crystallization;
- 8. Complex processes;
- 9. Theory and simulations;
- 10. Transport properties in crystals.

### Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases. **Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
