Message from the Guest Editor

Dear Colleagues,

The Special Issue on the “Raman Spectroscopy of Crystals” is devoted to theoretical and experimental, basic and applied research into all aspects utilising Raman spectroscopy to investigate processes in crystals and crystal properties. Scientists are encouraged to submit their manuscripts to this issue. The topics summarised in the keywords cover prime examples, but other related topics are also welcome. The volume is open for any contributions involving the Raman spectroscopy of crystalline matter.

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.
