Message from the Guest Editor

This Special Issue is dedicated to recent clinical advances and progress in the treatment paradigms for gynecological cancers. The topics of this Special Issue include, but are not limited to, the following: (a) the role of poly adenosine diphosphate-ribose polymerase (PARP) inhibitors in management of ovarian cancer; (b) the role of immunotherapy in the management of advanced endometrial and cervical cancers, with an emphasis on biomarkers; (c) adjuvant therapy considerations in early endometrial cancer with molecular classifications; (d) managements of rare histologic subtypes, such as uterine leiomyosarcoma, carcinoma of vulva/vagina; (e) role of sentinel lymph node sampling in gynecologic surgery.

We look forward to receiving your contributions.
