submissions:

31 December 2024

Message from the Guest Editor

Dear Colleagues,

Welcome to the inaugural edition of “Biliary Tract Cancer Updates: Advancements and Insights”. Biliary tract cancers, encompassing malignancies of the bile ducts, gallbladder, and ampulla of Vater, present formidable challenges in diagnosis, treatment, and management. With this Special Issue, we aim to bridge the gap between scientific discoveries and clinical practice by providing comprehensive updates on the latest developments in biliary tract cancer research and practice. Moreover, “Biliary Tract Cancer Updates” serves as a collaborative platform for researchers, clinicians, pathologists, and allied healthcare professionals to contribute to the collective knowledge base in this specialized field. We invite submissions from researchers and clinicians across diverse disciplines to contribute their original research, clinical insights, and perspectives to this Special Issue. Together, let us explore new horizons and pave the way for groundbreaking advancements in patient care.

Thank you for joining us on this journey of discovery and innovation in the fight against biliary tract cancers!

Warm Regards,
Dr. Kristen R. Spencer
