Cagliari, Italy

Deadline for manuscript submissions:

**closed (15 June 2021)**

### Message from the Guest Editors

The domestic sheep (*Ovis aries*) and goat (*Capra aegagrus hircus*) are small ruminant species widely distributed throughout the world. They are raised in intensive or extensive production systems, usually on a smallholder farming system basis. Sheep and goat dairy products play an important economic role in many countries, particularly in the Mediterranean region, being closely linked to the culture and traditions of vast areas.

Today, traditional ovine and caprine dairy production chains, from farmers to exporters, are facing the challenges of innovation, sustainability, safety, and productivity, while at the same time protecting each product's individual characteristics.

This Special Issue will welcome scientific contributions in the field of ovine and caprine dairy production with ground-breaking perspectives and approaches, from physical-chemistry studies on milk and dairy, to new feeding strategies, herd management, nutritional quality, animal welfare, sustainability, and omics studies.

## Message from the Editor-in-Chief

*Dairy* (ISSN 2624-862X) is an international, peer-reviewed open access advanced forum for studies related to the advances in dairy science. It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [ESCI \(Web of Science\)](#), [Scopus](#), [FSTA](#), and [other databases](#).

**Journal Rank:** CiteScore - Q2 (*Agricultural and Biological Sciences (miscellaneous)*)
